

Here is the transcript of the one hour audio, with all parenthesis being targetedartist comments-

Geoff Brady (GB)- “Welcome to ‘In Other News’ Radio New York, I’m Geoff Brady. We are going to take a look at another case of organized stalking and covert microwave, radar attacks and torture. In 1982 Karen Melton-Stewart was hired as a Foreign Language Intelligence Analyst with the National Security Agency. However after nearly three decades she was wrongly terminated after questioning ‘why’ another woman was credited and promoted for her work. Specifically it was a project that ended up saving many lives in Operation Iraqi Freedom”.

“Karen Stewart had followed up with a lawsuit against the NSA through the Baltimore Equal Opportunity Commission. But her case was oddly dismissed without a hearing. Since then she has sustained criminal and vicious harassment at what she describes is through the NSA’s direction. Specifically the Department of Homeland Security subordinates working out of FUSION centers. Karen Stewart publicly shares her story giving legitimacy to the many thousands silently suffering from microwave attacks and harassment”.

“Despite misdirection in the corporate owned press the biological injury from microwave attacks has been confirmed against US diplomats in Cuba and China”.

“Karen is retired and happily married. Karen joins us today to talk more about the details of her career in the NSA, organized stalking and the microwave weaponry used to torture victims”.

GB- “So Karen Stewart welcome to “In Other News””.

Karen Steward (KS)- “Thank you very much it’s a pleasure to be here”.

GB- Karen, on this show we’ve had more than thirty victims of organized stalking to talk as guests about their cases. Their backgrounds and lifestyles range from activists, to psychic empaths, to a civil engineer... and they are mostly women. Would you please give listeners an overview of how you became a target of organized stalking as a twenty-eight year veteran intelligence analyst in the National Security Agency?

KS- “Yes, I would be glad to, because some of the victims are whistleblowers. I worked there as you said for twenty-eight years. Discovered a huge project, I was the main author of, and my boss had given credit for my work to another woman. She had gotten a double promotion meant for me. – I was told this by a promotion board member. Because I didn’t know, I asked Inspector General George Ellard to please look into it to see if it was true. Just because somebody makes an allegation doesn’t make it true. When I did that, I suddenly became the target of a mystery investigation. As if I had done something wrong”.

“And that was purposeful. That was to make people mistrust me and to turn the tables on me. This continued for about three years and it turned into not only NSA security- low level security people stalking me all around NSA. Like if I went to the bathroom for Pete’s Sake, they would station somebody outside the ladies room. If I went to another office they would send somebody standing in the hall waiting for me to leave. They would send them along with me just to follow me. So it became rather irritating and certainly intrusive.”

“Then I noticed that people began to treat me badly. Or to shun me. I had one friend who called up and said, “Karen, you know every five to seven years there are reinvestigation interviews of people that you know or that I know or whatever, just to make sure that we haven’t turned into alcoholics, or done something stupid”. I said ‘yes’. And he said, “Well, I just had the most bizarre reinvestigation interview that I’ve ever partaken in. And it was about you.” And I said, “How so?” And he said, “Well, this man from security was trying to get me to say that you were this or that...” And he wouldn’t tell me -He said, “I’m not going to tell you because it would make you furious.” And he said that, “We almost got into a fist fight, because he wanted me to say things about you, that I knew having worked with you for so many years couldn’t possibly be true.” He said, “So I wanted to call you up and warn you something’s going on and I don’t know what it is.”

KS continues- “He knew that my work had been stolen. Accredited to another person, because he worked on the same project. That was very definite. Definitely alerting me to this”.

“Then these people took the stalking off the NSA campus. They were having people stalk and harass me to and from work, and going into stores. They would follow me around stores. As if I were a shop lifter or something, which I have never been. They were NSA security people. - Every so often, the ding-bats would forget to take off their NSA security badges.”

“So we got to a point in early 2009 where they were doing coordinated aggressive driving attacks from my home to NSA. Almost putting me in car accidents which would have not only hurt me, but anyone around. They would surround you and make sure that they controlled how fast you

went. If you decided you needed to go to another lane they would quickly speed up and make sure you couldn't go into that lane, and you would miss your turn. It was things like you know. And doing something on their breaks. Like swerving into you or making you think they were going to swerve into you. Hoping that you would swerve and hit the other car. It would be your fault. That is what was going on".

"And they also poisoned a family pet to death. At that point when they were endangering my life and had killed a pet, I went to supervisors and said, "Look, you are pretending to have some kind of investigation of me. I've done not a damn thing wrong. I said all I reported was somebody who did something pretty darn wrong. You know, stealing somebody's work credit and stealing their promotions.

I said, "This needs to stop, because this is absolutely ridiculous". And they were apparently threatened and told that if I said anything to report me. As soon as they reported me, they stripped me of my clearance. Put me in a menial job. Said, "Oh you are paranoid, delusional. You think people have stolen your work, and your promotion. And you think people are stalking and harassing you."

KS continues- "You know they didn't do any kind of investigation. I said, "Look, I have license plates, I have makes and models of cars. And I have images of people who are doing it. So I do have something to investigate." They said, "We don't need to investigate."

Educational billboard.

GB- "...I just want to go back for a minute to your report. From what I understand in previous interviews that you've done, this NSA report actually saved many lives. And if your name was on it, and other people knew about it... seems to me that it would be pretty easy for you to have the proof that you are the author of this report. Why wasn't that easy to do?"

KS- "Because they would ignore it. I mean, I can't even tell you how many reports that I wrote, because I wrote reports starting from June of 2002... into ...January 2003. The report had to do with the invasion of Iraq, Russia... and I'm not telling you anything that's not been in the newspapers. Russia had been selling jammers to the Iraqis under the table that affected our missiles. And we didn't know about it until I did research and found out about it. So I wrote I don't even know how many reports, that basically told them who was selling jammers, what the dimensions were, what the capabilities of these devices were. How they were selling them to Iraq, how they were getting them there. Via what countries, by truck, by helicopter"... But that engendered a team that went out and took the information and created jammers on their own to

see, is this an efficient jammer? They found out 'oh by golly' it was. And so that worried everybody”.

KS- “Before the invasion, they actually took time to destroy the jammers. And by the time we invaded in January 2003, there might have been two or three left which they quickly took care of. But the newspapers reported that some of our missiles had actually gone astray and that’s why... so the Pentagon told NSA upper management my reports had actually in their estimation saved about two thousand American military lives during the invasion. That is what made the work so attractive to my upper-echelon boss. To steal it, have my name taken off the reports and another woman’s name put on them. Because they were talking about how this was such a good piece of work they wanted to promote me for it. This woman that he wanted to promote had been sleeping her way through the ‘weapons and space management’ wanted the reward”.

GB- “Ahh OK. That’s what I was wondering about, what made this woman eligible at that level to really be involved with such a diabolical scheme. To steal somebody’s work and to be OK with it...

KS- “I think she was either a ‘honey pot’ for either the ‘deep state’ or a foreign entity.”

GB- “OK so we are getting involved with what Jeffrey Epstein might have been involved with... not saying that he was involved with it, but it is on that level probably.”

KS- “Yes, I think so. Like you said, in early 2009 I went to my branch chief and his deputies who had been very nice to me for quite some time until after the first of the year. Then they were acting rather peculiarly. And when I went to them saying, “This is enough. There obviously is nothing going on. I’ve done nothing wrong or they could have found it certainly in three years. You know, it’s only harassment at this point... and it needs to stop.” They reported me. I was told to report to security”.

“Security said, ‘Oh, you’re a paranoid, delusional crazy. You can’t have any type of clearance. We are stripping you of your clearance and we’re going to send you to the travel office which is another building and in which you don’t need any type of clearance”. It was very menial work: ‘Jim Smith went over here to San Antonio and his trip cost X amount of dollars, and we reimburse it. It was just incredibly menial. But when I started parking in their parking lot which is across from a separate security entity I started seeing the people reporting to work who were stalking and harassing me. So I gathered some license plates, makes and models of cars and went

to the police. The police got back to me and said initially they would investigate. Then they got back to me and said, "The NSA has forbidden us to investigate."

"And at that point NSA panicked and said, "OK you are on administrative leave. We can't have you on the campus because you are just crazy and dangerous." I thought OK, that's interesting".

KS continues- "So they transitioned from people who were obviously NSA security who looked like they were ex-military: maybe got out at age 25-27, still had the military haircuts. They transitioned from low level security to civilians. And I thought, "What in the world?" The first week I was home it was very quiet, but then noticed civilians seemed to be stealing my mail. So I thought, what in the world is going on? Well, I investigated and found out what NSA had done- and this goes to other agencies too... NSA went to the FUSION center that's nearby. I'll give you a little bit of background if you don't know what a FUSION center is."

KS- "After 9/11, NSA lied to the Congress and said "Well we couldn't stop 9/11 because we just didn't have the capacity to share information with low-level law enforcement and other agencies. So we need to make FUSION centers". Now... There are about 80 FUSION centers all over the United States and they have representatives from the FBI, NSA, and all kinds of Federal agencies. But they also interact with law enforcement: police departments, fire departments, sheriffs departments, etc.. to keep an eye on what they think might be a ' threat ' in that area". (View <https://www.ae911truth.org/>)

"But what they are doing in actuality is taking out contracts on people. They are saying, "Oh, this whistleblower could be a problem." Let's report them as a 'terrorist'. Then we have these civilians that FUSION centers hire- INFRA GUARD... who are paid under the table tax dollars, gift cards, services, or paid with season tickets to some football games. We are going to pay people to harass whistleblowers... We are absolutely going to destroy whistleblowers and make sure that they never think it is a good idea to tell on us. We are also going to put contracts out on journalists who write stories that we don't like. And any other person we find an irritant. Or somebody we wish to destroy politically".

KS continues- "Of course those are not the only reasons. They are hot into human trafficking. So they have partnered with all kinds of corporations and medical laboratories and things like that. And it would appear that these partners, let's say Raytheon will come to them... "Hey, we have this new directed energy weapon we want to test out on people. Can you declare about a hundred people in your area to be terrorists, so that they can be stripped secretly of their constitutional rights, human rights, civil rights, and we can get people hitting them with these weapons from nearby. What are they going to say? They are going to get hit with electrical weapons that most

people don't know exist. So we're going to put it out there that anybody reporting something like that... It's just a mass delusion. Ignore them. Don't let them file police reports cause it's just a waste of time".

GB- "Is this speculation on your behalf or do you really know that this is the way it operates"?

KS- "Well, we are having people talk about being hit with certain types of weapons -comparing notes. And then we're seeing in some cases not all cases Raytheon, General Dynamics, or somebody come out with a weapon that by-golly does something very, very similar. So we are putting the pieces together. The documentation is very difficult to get. Because they are guarding it with their lives. But we are able to piece some if it together when they come out and announce, "We have this fantastic, wonderful, new directed energy weapon,"- and its been what the victims have been talking about for quite some time".

"There is one thing that we have discovered, if they hit you in your house with it, it will make you ill immediately. It will make you throw up. We've compared notes on that and found that it was a 'Lilly wave' and you have to actually leave your house to get away from the wave and not be sick anymore. It's basically connecting with a lot of people and comparing notes and comparing research that a lot of people have done to show that these are absolutely, definitely weapons. (A Lilly wave is a bi-phasic electric pulse that stimulates neurons of the brain to resonate at a certain frequency, to control the brainwave patterns of the brain for mind control.) Directed energy weapons are actually being produced for sixty-plus years but have been kept secret for several decades. And are just now coming out saying, "Hey we have these, they are really wonderful stuff" People are saying, "Oh my God, that is what I was hit with for like six months".

"That is exactly what happened to me. So if we could get police who have expertise to investigate, I think we could prove it. But (the military/medical industrial complex) they are halfway... they don't know whether to brag about their capabilities, or keep denying that this even exists. It becomes very problematic".

GB- "A past guest Attorney Jerry Leaphart, Dr. Judy Wood's attorney, brought a Qui Tam case against the federal government regarding the NIST report, which concluded fire melted steel. (Dr. Judy Woods wrote 'Where Did the Towers Go? Evidence of Directed Free-Energy Technology on 9/11'.) – They had found that there was a company involved in making directed energy weapons and that was Applied Research Associates, (ARA) one of a number of companies involved" (Geoff wonders if they also make portable energy weapons that have 'been around for quite a while' as well as 'scaled up larger weaponry').

GB continues- “A past guest Helena Csorba had mentioned that there was something called dielectric permittivity that could dial in specific substances that a radio wave would be able to evaluate. -Whether solid, liquid or gaseous. This weapon could dial in a specific organ in the body or subtract the foil helmet that somebody is wearing and go directly to the brain. Are you familiar with any of that material”? (Dielectric permittivity is the primary diagnostic physical property in ground penetrating radar (GPR).)

KS- “Some of it. I have read and seen indications that Raytheon has something called ‘The Raven’s Claw’ -and they, depending on the frequency, can dial in and attack any organ in the body. Because the kidneys will have their own frequency. The stomach will have its own frequency. Your brain will have a different frequency... and they can dial that in and attack somebody’s kidney or aorta, or things like that. Which is horrifically alarming. ... I’ve spoken to Helena a little bit”. (Karen agreed with Helena, that perps using energy weapons like Raven’s Claw think), “Oh this person is surrounding themselves with reflectix which is an attic insulation, or they are surrounding themselves with something else (metal cookie sheets)... so we’ll just dial this in and bypass it, and hit this person”...

“So I always recommend to people that they use multiple layers of different types of material to make it harder to hit them. These people love to hit us in our sleep, they are going for that kill”.

“ What it looks like is that they basically load the ‘terrorist watch list’ with as many people as possible generally just to get the money from the state and federal entities, and say, “Look we’ve got a whole bunch of people in this area very dangerous, so we need to double our work load and we need to double our salary”. You know, it’s JUST A SCAM. Judge Trenga, I think it’s the sixth district in Virginia... declared the watch list absolutely, totally unconstitutional. Which of course anybody with common sense would know. They fabricate false dossiers against you, on order. Send people out to stalk and harrass you. And I found evidence that they go to the local police or sheriff’s department and say, “Look Jim Smith’s on our list so you can’t help him. If he ever comes here for help you just ignore him. You put him down as a nut case”. (See Wall Street Journal of Sept. 5, 2019 <https://www.wsj.com/articles/federal-judge-rules-major-terrorism-watch-list-is-unconstitutional-11567658552>)

KS continues- I went to the Tallahassee, Florida, Leon county Sheriff’s department to speak with them about (energy weapons) attacks that were not only affecting me but were affecting my quite elderly parents who I was visiting... And the duty officer said, “What is your name again?” I told him and he said, “OK come with me.” He walked out to the parking lot, to his own private car, and opened up the trunk. He took out about twelve to twenty folders. He checked the spelling of my name. Found my folder. Opened it up and said, “Yeh I’m not allowed to help you.” And put

them back in the trunk. Why in the world were folders of certain people in the private car of the duty officer”?

“Well what they did was- everytime they switched duty officers, they switched the folders to that persons’ car. Then if somebody came in and gave them a description of certain types of things like stalking harassment, electronic harassment, etc... they would go out and check the trunk to see if this is one of the people the FUSION center had told them they were not allowed to help”.

GB- “If listeners are wondering why this is important, a large part of it is because whistleblowers are targeted on this level and we wonder why things aren’t getting done. It’s business as usual for the corrupt people in our federal agencies, our state agencies. Well... this is one of the reasons, because the people... trying to make change are being severely targeted by organized stalking and specifically the microwave attacks. Those can be really deadly for some people and in essence torture. Karen it is not easy to imagine that someone would actually do this to another person... You were hit with them as well. Can you talk about how you sustained injury from directed energy and microwave weapons”?

In one night Karen Stewart suffers weaponized WIFI burns or radiation dermatitis at home in bed. This photo shows ‘directed energy weapon’ attack injuries. -What our United States CIA and US State Department call, ‘neurological attacks’ made by ‘neuroweapons’. Neuroweapons are DEWs.

KS- “Yes, I’m one of... I don’t know how many. We estimate that there may be two to three million inside the United States are being targeted in various ways. Most of them with organized stalking, and with directed energy weapons. Though some of them are actually being hit with poison gases in their own homes. It depends on the program they put you in and how they want to human traffick you”.

(Karen Stewart lived in Maryland during the time she traveled to Florida to be with her parents who were ill. Simultaneously her lawsuit began against the NSA for wrongful termination. Her mother had taken a fall and was in rehab. Her father needed to be taken care of in her mother’s absence). “So I went down there and it turns out that I was there for about two years. During the first year, my lawyer had asked for subpoena power to get the identity of one of the upper echelon managers who was participating in my harassment. And NSA’s reaction to that was not only to prevent the Equal Employment Opportunity Commission judge from issuing a subpoena which is illegal. But they went to the FUSION center in Florida where I was visiting, and said, “Look, we want you to portray her to the neighborhood and to the town, and to all the people who basically work for you -the civilian mercenaries who you employ secretly... We want you to portray her as a traitor and or as a pedophile. I actually heard that from one neighbor telling another neighbor that I was a pedophile. I never in my life have been, nor would I. So I was

rather shocked. And then heard that from somebody else on the internet- they were told by the NSA to spread it around”...

GB- “I’m glad to hear that somebody told you this is what they heard. Instead of continuing the gossip. That is so vital, that is so important. Was there any indication or anything specific you might recall that prompted these people in your neighborhood to let you know that this was going on”?

KS- “One of them said it accidentally. Where she thought I couldn’t hear it. And I overheard it. The people she told had just moved into the neighborhood. Had just bought a house. They had children. They resold the house and left. So this woman’s lie cost these people several thousand dollars I’m sure. Another woman... was a friend on Twitter. She said, “Karen, I just got a message from somebody who said, “Don’t be friends with Karen on Twitter”. She said, “Why on earth not”? They said, “Well, I was told by the NSA that she’s a pedophile”. (Karen’s reaction was disbelief, and she asked her friend to write a letter). “So she agreed to write a letter to my lawyer we could put in the case. She said, “Karen, even though it’s Twitter, I’ve known you, I see what your opinions are. I don’t think this is possible”. I said, “You are right, it’s not”. When my lawyer sent off the subpoena, I started to see activity around the neighborhood where two people with badges would go house to house. And they skipped our house. Where they went in- several of those seemed to be participating in harassment, and...got the directed energy weapons eventually. So they were basically told, “This is a bad person and we need to kill her”. And in so doing they were harming my parents”.

KS continues- “I will let you know that the first few weeks that they did this, (energy weapon attacks) they did it at night from midnight to about dawn. And they had contractors who first did it, until they got people in the neighborhood to agree to do it from their homes. (Or perps, who) ... would run into the woods in the evening and then come get picked up in the morning just as dawn was breaking. We would be hit with horrific electronic emanations throughout the night. So bad that it would make you shiver. So bad that... the refrigerator and washing machine were affected. My iPhone and router were destroyed: they were fried”.

“After several weeks and months of this I started to get health effects. When this started, I said I can’t have my parents subjected to this. So I began sleeping in the laundry room away from them. They didn’t get hit as hard. I developed heart damage, and bleeding in the brain. Had a blood clot that went down my throat at one point, and they could tell that I had bleeding in the brain. Yet I had no outside damage. So how does that work? I also had scarred retinas. Vision damage. How does that work? All of it was appearing at once, and there are some other things. But you just don’t go about your life having no health problems... At that point I was in my 50’s. My parents were in their late eighties, early nineties. So we have extraordinarily good genes. The joke in the family is that we live forever unless we are hit by a bus. They started having heart

difficulties just when I did. So how do you develop heart problems in the very same year that your elderly parents do? They both develop at the same time and you are twenty-seven years younger and you develop that at the same time”?

GB- “I’m really sorry to hear that Karen. You suffered this, in about what year was this happening”?

KS- “They basically started hitting us late 2015 to 2016. So that is when most of the damage showed up. It just kept coming. I can’t believe it, cause I almost never went to the doctor. Had no reason to, I had maybe a migraine once a year. I would describe myself at that point in my life... “I’m disgustingly healthy”. But now I’ve got multiple permanent problems”.

GB- “These problems are directly related to microwave directed energy”?

(Karen Stewart notes that what she just described is documented in literature as the side effects, or injuries of energy weapons)- “Very likely. I mean the fact that it would be all coincidence is a billion to one. The fact that you go fifty something years with perfect health and then suddenly develop multiple bizarre and unique health problems is next to impossible without outside interference. Something that would cause bleeding in the brain but no outside damage would indeed be microwaves. That would be one of the injuries microwaves can and have caused. Now there was an NSA agent named Mike Beck. In the 1990’s he and another NSA agent went to a foreign country they haven’t identified... but it was a hostile country. They were rooming together in a hotel and... got hit with severe microwave weapons attacks. Well both of them developed Parkinson’s disease. The other man died. Michael Beck was forced to quit working in his forties because he was so severely disabled”. (Was a spy’s Parkinson’s disease caused by a secret microwave weapon attack? – The Washington Post)

KS continues- “Now if you look into the stories about the diplomats who were in China and Cuba when they too were attacked by ‘mystery’ weapons. They called them ‘sonic’ weapons at first. But then there were some neurologists who came out and said “No, these are directed energy weapons. We recognize it as being microwave induced illnesses”. And permanent damage. Permanent eye damage, permanent hearing damage. You can actually be ‘sunburned’ by radio frequency weapons. There are various types of these weapons. I know a woman in Arizona who has gotten third degree burns laying in her bed at night, being hit with these weapons”.

“(Directed energy weapons) go from ‘war’ sized with the ability to basically fry everybody in a town or city. To being specifically aimed at a person with a certain frequency and certain DNA: they have gone from huge weapons of war, down to antipersonnel assassination size in the last few decades”.

GB- “Helena Csorba was mentioning how the US diplomats who were at the Chinese and Cuban embassies... I think she said doctors described the injury as the brain hitting against the skull causing bleeding. This weaponry from what I understand in your write-ups in the ‘ActivistPost’, is miniaturized. Would you tell listeners more about that”?

KS- “Well they have been miniaturized. They can be as small as something that sits in your hand. I’ve seen a microwave device that can fit into your hand. They can be in purses and bags. They can be attached to the engine of a car. They come up behind you and fry you. There are other devices. If they are harassing you on the street or as you drive. They will have several cars that will surround you and they try to make sure they get somebody ahead of you that has one of these devices on a battery pack in their trunk and hit you with it”.

GB- “In a more diabolical area several of the guests on the show have described how they were remotely raped and past guest Helena Csorba detailed how a computer interface can program microwave energy and could commit this act. Has this also happened to you? And what have you found in your research in regards to this despicable crime”?

KS- “It has not. I seem to be on an assassination program where they just want me to get cancer and die, or just die of bleeding in the brain if they hit me particularly hard. But I have read about it. I suspect they do try to get nano into you... It has to do with how they can do that. How they can affect nano in certain parts of someone’s body. The first thing that they do, I think, from my experience and from other people’s experience- is that they get a GPS chip into you so they always know exactly where you are at all times. They can locate you within two inches from where you are standing”.

“The second thing that they seem to be able to want to do, is get nano particles in you so that if you are standing in a crowd of people and they hit the crowd with a subtle strength of a directed energy weapon: You are going to be miserable, but the other people aren’t immediately going to be miserable. I’ve had people in the house with me where I’m feeling it and not feeling well, and within an hour or two- one or two of the people I’m with might get a headache. Because they don’t have the nano inside to catch and reflect the energy back into them. The people without the nano, it just passes through them. Even though it does have a deleterious effect, it does take longer for them to feel it and it does take longer for them to be harmed by it”.

“So this is very specifically target driven. And they can actually also hone in on you by your brain frequency. Because everybody has a unique brain frequency. Just like they have a unique fingerprint. Now when I was in Florida and they were hitting the house, he would actually get sick. My father and I looked more alike than my mother and I, and we have more physical things in common. It wasn't that he was exactly my DNA, but he was so darn close it was affecting him very badly. He would ask my mother to drive him out and away from the house for a while because he couldn't stand it”.

KS continues- “There was a lady that I've known... well she's been my best friend for forty years, and whenever I would go to visit her within half an hour they had people surrounding... subtly hitting her house with these directed energy weapons in their cars. And she would start to get ill. I said, “OK, well we must have some things in common... have a similar brain frequency or something like that”. So it is interesting even though it is horrendous the way that this works”.

“You can see how they can target somebody for assassination. Most of the people in the room won't have any idea anything happened and that person is dead. They've had bleeding in the brain, they've had an aneurysm or a stroke or something and nobody is the wiser. They think it is a natural occurrence and it is not. I think Justice Scalia was murdered. That's what it sounds like to me. And probably there have been other people murdered like that”.

GB- “Especially if someone (is) not very healthy it's easy to conclude it was a natural circumstance. The late actor and comedian Dick Gregory mentioned in an interview pre-September 11th, 2001 that an 'individual's' brain pattern can be read remotely'. And in fact he said that he was 'monitored' that way. You just mentioned brain wave patterns can be a specific signature for any kind of device to latch onto. Thought that was pretty outlandish when I heard it, but that was quite a while ago”.

KS- “They've been studying this in secret for a very, very long time. And they have pretty much mastered almost any and all frequencies. Think of the fact that they know what frequencies they hit your home with can make you severely depressed to the point of suicide. They can hit a crowd of people that are peacefully protesting and maybe they don't like what it is they are protesting. So they hit them with a frequency that severely agitates them. The people become violent and angry and don't even know why. They totally discredit that group and their cause”.

GB- “Well that is starting to explain a few things. You've written about how civilians are recruited to wield microwave energy weapons against people. Can you talk a little more about

that for our listeners”?

KS- “ Well it would appear that the FUSION centers decide if they have a target within a certain neighborhood. They send out someone from the FUSION center or perhaps INFRAGARD. (Wikipedia defines InfraGard as “a non-profit organization serving as a public-private partnership between U.S. businesses and the Federal Bureau of Investigation”.) INFRAGARD is a highly organized group of civilians who work for the FUSION centers, and usually try to claim that they are volunteers, but they are not. They are getting paid under the table... I’ve talked to them and they have confirmed it. We will get back to that”.

“A FUSION center blankets a neighborhood. What they do, it would appear... They say, “Hey, John Smith over here, he is a really bad guy. But we don’t quite have enough legally to arrest him and charge him with anything. But we’ve got to stop him. It’s your duty as a human being and as a patriot. You’ve got to help us stop him”. And of course the person is like, “Sure, sure what can I do”?

“They don’t question- ‘Why don’t you have evidence’? ‘Why can’t you charge him’? ‘Why can’t you arrest him’? (FUSION center employees) they say, “Well we can’t, you know he’s too clever. So in the name of social justice, we’ll be giving you some devices that will hinder and hopefully maybe even kill him. And we’ll just get rid of this problem. Or if it doesn’t we’ll drive him from the neighborhood and you won’t have this problem”

KS continues- “Course John Smith has no idea this is going on because he is never told he is being accused of being a traitor or being a terrorist, or being a pedophile. He’s never told, you know. -This is totally against the Constitution. They hate and fear monger throughout the neighborhood and seal the deal by saying, “Oh by the way, if you take this device into your house: You are next door, you’re in line of sight. Hold this on him, turn it on and keep it on him... and we’ll give you a thousand dollars a week”. Easy money, under the table, you don’t have to report it as taxes. So even if people are uneasy, as soon as they get a huge amount of money waved in their faces they are all in. Because they are told, “Hey, you know, we are the FUSION center, we’re law enforcement, nothing can happen to you. You are doing this under our auspices. It’s not a crime if we tell you to do it”.

GB- “And then there is another level Karen. Who are aware of the crime that they are committing and agree to do it and they are more on the criminal level. Can you talk more about that”?

KS- “Yes, they do actually employ criminals. I’ll give you the example in Florida, when I started being stalked and harassed 24/7 and this was before they were hitting me with the energy weapons. All through 2015 I was being stalked and harassed by people who had cars like Toyotas, Lexus and some of these other cars that showed they were accomplished people, you know they were upper middle class. At that point in time I started giving interviews. And a lady named Sher Zieve, actually wrote two articles... One interview I gave anonymously to tell her about this program. The second one, I said, “I’m just going to go ahead say my name and stand behind what I’m saying”. So she wrote a second article. When I found myself being stalked and harassed- at least one of these articles had a very short link. So I put a link on the back of my car using letters from HomeDepot”. (One of the articles written by Sher Zieve: <https://canadafreepress.com/article/nsa-whistleblower-comes-out-of-the-shadows-into-the-light>)

“And these people who had been told to follow me around everywhere: multiple cars all the time. Whenever they would get behind me and I would stop at a red light they were curious as to what that link led to. The link led to the fact that I was saying that the NSA and all these other agencies were corrupt, corrupt, corrupt. The FUSION centers were corrupt. The watch list was a scam.

KS continues- “So I witnessed several people who sat behind me, during a red light. Look up this link. Then I would see them either shake their head... or do something that indicated to me that they were extremely disgusted with what they had been told to do and why. Many of them would turn around and leave. -So I started to disrupt the INFRAGARD who thought they were patriots and doing something”.

“Then I began to notice that the cars following me 24/7 became very bad cars. They were very old cars, not in good condition. They had lost the kind of people who had any kind of education and were basically tapping into the people who... just didn’t have jobs or... who were actually crooks. They had LOST the STORY and they went down a layer to people who knew they were hurting people and didn’t care. They went to criminals”.

“We have speculated that not only do they get money, like other people did. But probably were giving drugs, or they were given deals to get them out of jail early or reduce some kind of fine. Or reduce the sentence. They utilize everybody they can. We think too that they get the criminals to do heinous criminal acts like murdering a pet, vandalizing your home or your car. -The guy who is a CPA, he’s not going to do that but he will follow you around. He’s not going to slit your tires. They use proxies to keep themselves up and away from the crimes they induce people to commit.”

Much of Karen Stewart's experiences and TI group investigation is collaborated in the full transcript of 'a rare radio interview' by a gangstalker who says he worked for "SIS, Security Industry Specialists, Inc ". The transcript can be read at targetedartist's April 11, 2018 post entitled 'Confession'. The YouTube site originally used to transcribe from was Builder Rejected's October 14, 2017 audio entitled 'Silent Holocaust Whistleblower Testimony'. Today this 'saved YouTube recording' of one hour twenty minutes is at the YouTube address of Kruno Baraba: <https://www.youtube.com/watch?v=4jJebz5dsA8>

-At the beginning of the recording the gangstalker confesses, "When I realized how horribly out of control it was, how down right evil it was... Once I began to realize that SIS was experimenting on it's own employees, my fellow security specialists- I was outraged... I later learned my company was involved in a larger social engineering program that encompassed the entire city of Seattle"...

Back to the 'In Other News Radio' New York interview with Karen Stewart:

Geoff Brady (GB)- "Three states have outlawed microwave energy weapons: directed energy weapons. They are Michigan, Maine and Minnesota. The United Nations has specific laws regarding these weapons. Are the laws and policies prohibiting the use of these weapons strong enough to protect the public in those states"?

Karen Stewart (KS)- "I would say no. Because they don't know how to enforce them. In order for you to arrest somebody for using a directed energy weapon you have to prove he has it. And in order to prove he has it, you have to have a piece of technology. A meter that not only shows what is being used, but where the source is. It is very difficult to source it. Again you need equipment that is extraordinarily expensive. These police are told that it's illegal but they have no way to prove that it is happening or who is doing it. With some of the cheaper meters you can stand inside somebody's house and you can see the meter is absolutely going crazy. But you don't know who is doing it. And it seems to be difficult to get a search warrant for somebody who is in line of sight".

"That is the normal protocol- that to hit somebody you have to be in a home, or a trailer or an apartment or whatever that's line of sight. To be next door, or you have to be on top, you have to be underneath... but the law hasn't caught up with the crime! So the police are stymied to be able to apply any kind of law that comes along. So it's a nice start but it does very little".

Forbes: The Pentagon Fears That Deadly Microwave Weapons Are Undetectable
03/https://www.forbes.com/sites/michaelpeck/2021/03/02/the-pentagon-fears-that-deadly-microwave-weapons-are-undetectable/?sh=7e87dde6cc3f Why is it that current Associated Press reports of DEWs attacks in the United States pertain only to US government employees, US diplomats living in other countries, and not US civilians?

GB- “Karen, the corporate owned press has ignored or covered this topic in a way that has portrayed victims as psychologically impaired”.

“Past guest Josephine Grace has pointed to the New York Times article ‘The Sound of Things to Come’, by Marsha Sella: as one of the few truthful articles on the subject... What are your thoughts on the corporate owned press writing about this topic”? (<https://www.nytimes.com/2003/03/23/magazine/the-sound-of-things-to-come.html>)

KS- “Well, they have definitely been threatened. And I do believe that certain mayors, police chiefs, sheriffs, etc., etc. were told to get with the program or suffer the consequences. I was talking with several people and we were comparing how many good-old sheriffs that ah, lived in our counties. They were very revered by our parents and have suddenly died of brain tumors. And we thought... ‘Oh dear God’ are these sheriffs... We knew them to be Constitutional sheriffs... and we speculated could these be sheriffs who they came to and said, “We need you to do this and this”. And they said ‘NO’, that is against the Constitution.”

“Did they hit them with directed energy weapons to produce brain tumors and then put their own people in? Cause we have found that every single time that happened, the guy that replaced them was all in with the program. -We think they are making money hand over fist”.

“Not only are they getting toys for their police departments and sheriff’s departments. But we think they are making money under the table as well. Because we have found that lawyers and other professionals don’t want to talk with you about it: “No I don’t want to hear it”... You know? They’ll either just totally avoid it, and say, “No, I don’t want to talk about it”, as if they are being listened to and they don’t even want you to mention it. Or they are scared. Or, they are making money off of it”.

GB- “A very deep compromised situation if you are involved. Catherine Austin Fitts, a financial expert, had stated that nearly 50% of Americans are involved as perpetrators of organized stalking programs. Karen, based on your experience as an NSA intelligence analyst, would you

talk about how pervasive organized stalking is in the United States for example”?

KS- “You know it is everywhere. Now my stalking and harassment began in Maryland when I was working for the National Security Agency. That is the first time I saw the billions of dollars induced into stalking and harassment. I found out they were being paid and directed by the FUSION center. Well, when I went to Florida to see about my parents, at that point in time I wasn’t being stalked and harassed. When the NSA fired me, they ceased the stalking and harassment because they were doing it in order to try to get me to talk about it- so they could say: “Oh, you are paranoid, delusional. You can’t hold a clearance if you are mental, so we are going to fire you. So that was their trick at that point”.

“When I went to Florida to deal with my parents’ situation. Again, like I said, had my lawyers ask for the right to subpoena something. Which made the NSA crazy, they went to the FUSION center, told them all kinds of lies and stalking and harassment in Tallahassee, Florida began. Then after about a year when they were losing ground and had to use crooks cause I was getting the message out there that they were being lied to. By the end of 2015 they started with directed energy weapons”.

“When I was at the NSA, I came back two days after 9/11 and ended up hearing another fellow analyst talk about how they had all the information they needed to save every single person on 9/11 but management had forbidden them to warn people. That was absolutely horrific”.

“I started talking about that (in Florida). Because I said, “You know if you are going to do this to me. I’m going to bring this topic to the fore because nobody is talking about it”. So when I started to do that, they started hitting me with directed energy weapons. They were not pleased about the subpoena. They weren’t pleased about me talking about 9/11. I think the first few weeks they were hitting me, they actually were trying to kill me to shut me up about that. But I took to shielding kind of intuitively. And survived it, and still am surviving it today”.

“Even though I have damage. I have damage that will be very clear. What we are doing now, is we are comparing notes so that we can say, “If you have this, this and this type of damage. And you have this type of MRI or you have this type of CAT scan that shows ‘X,Y,Z’- then you are being hit with directed energy weapons. There is no question. So we gather the unique data, as to the damage that these things do. It has been shared with certain neurologists around the country. So they know about it”.

KS continues- “But as far as the Network goes, when I left Florida and came back up to Maryland it took them probably about a half an hour to start hitting my home with the directed energy weapons again. That is how vast the Network is. We’ve got 80 FUSION centers (in the US) and those are the epicenters for organizing those Networks of people”.

(See where the FUSION centers are in the state you live... <https://www.dhs.gov/fusion-center-locations-and-contact-information>.)

“(FUSION and Network employees) they feel like they are patriots: when they are actually INSURGENTS and TRAITORS. They can BULLY someone... and feel like they are really, really powerful. And they are. Because the police are told to turn a blind eye. The Network is vast. Now is it 50% of the American public? I hope not. But if you want to extend it to the Mayors, police chiefs and the other people: she (Catherine Austin Fitts) might be right. I hope not, but she might be. Because the Network is astonishing. They’ve been building this Network for twenty-plus years. It’s a secret society basically that says, “We get everything, and you get nothing. And we are going to make sure you get nothing. Cause you are not part of the club”.

GB- “The population, specifically in the United States, is under very sophisticated attack. Those who are selected for organized stalking become involuntary experimental human subjects by the medical/military industrial complex. These subjects are at the leading edge of a profound, sadistic tyranny. Their data points are measured while under total surveillance, harassment and in pain. Would you please talk about your research and understanding the goals of organized stalking”?

KS- “I spoke with Chris Dorr about organized stalking. It basically is to trick yourself into portraying yourself as paranoid delusional and therefore, ‘undeserving of help’. “Oh, this person’s crazy”. Police have been told either this is mass delusion and they need to not waste their time with this person, or they are told, “If you hear this, this is a signal for you to know that this is a targeted individual and you are not able to help them, but they are a very bad person. So if you can, try to turn anything they report against them. Because we also would very much like to see them committed into an ‘insane asylum’ which is for profit to the Department of Homeland Security. Or we want them put in a for-profit prison. Because in either of those two places we can experiment on them even easier, than in their own home. So they (recruitable stalkers) are drawn into this”.

KS- “What else are they doing? They are basically hitting journalists. They are hitting whistleblowers. They are doing medical experimentation- but what does that entail? What are they doing medically? I’m saying that there have been reports from people that they have been in

staged car accidents, got to the hospital, where they had something extra done that didn't need to be done. And then came home with some very odd things going on".

In one month a TI in Springfield, MO experienced FOUR violent car accidents occurring within inches of their car. This TI claims to pray over their vehicle the very minute the key goes in the ignition: asking God and angels to protect at all times their car and anything in it. Why did all four 'staged', violent car accidents occur at large intersections with a different police vehicle sitting at a red light at all of them? Were they to be a 'witness' to the 'accident' ?

Karen Stewart continues- "Let's go with Bill Binney (30 year veteran of NSA) he found that he had been chipped. He said that 'Starting in the night, when you are just about to go to sleep. Chips were sending horrific pain signals through his body and that would keep him awake. Now that is one of the techniques that they use. They use sleep deprivation. Because that kills you faster. It makes your health go in the toilet much faster. So everybody I've always talked to said, "That yes, the weapon strength intensifies during the day until at night it is horrific". That is to keep you from getting a good night's sleep. Eventually lack of sleep destroys your health and you die. Part of this is also a eugenics program".

"They are saying "Well there are too many people in the world, we are just going to kill off a few, while gleaning all the information we can from them. Concerning maybe how a medical disease works". Some people are chipped when they did not consent to it during a plastic surgery or they went in with a broken leg and came out with chips that seem to affect their arms- and couldn't possibly be for a leg. So what they think is that once they've got them under they just put whatever chips wherever they want to".

"Some TIs have reported that they are degenerating as if they have a certain disease, when they never have and it's not in the family and it's not likely they would get it at that age. So they report being experimented on as if a disease was destroying them to perhaps get knowledge for a medical company to treat these symptoms, the disease or syndrome better"...

"They are using healthy people. To destroy their health, examine the process and then charge millions of dollars to the people who are born with 'the problem', or contract it from a disease or get it from a car accident. They are destroying healthy people. To get the knowledge on how to make a lot of money helping people who are not so healthy".

Karen Stewart continues- "All of this is just any and all types of human trafficking they can think

of. Certainly one of the aspects not only is population control: use them and kill them off. But they also are investigating transhumanism. How can we invade a human being and turn him or her into more or less a pleasant robot that we can control”?

GB- “These are areas that have been explored on this radio show, ‘In Other News’ and of course many other outlets as well. Thank you again Karen Stewart for being on ‘In Other News’ and sharing this information not only relating to your case which you have suffered, but also about the worldwide community of men, women and children who are also sustaining microwave, radar attacks. There is a detestable, psychopathic scourge dwelling among us. Freely operating beyond any standard of ethical boundary. Right now they appear beyond the reach of law enforcement or any type of justice. But with your work and many others the tide is turning. Thank you so much.

KS- “Well thank you for giving us a venue. With which we can spread this information. Cause without people brave enough like you are: This would just stay... you know... preaching to the choir. So thank you very much.

Thank you Geoff Brady and ‘In Other News Radio’ New York. And thank you to Karen Stewart. Listen in at <https://inothernewsradio.com/podcast/in-other-news-october-11-2020/>
